Product Description

The Netis EAP912 Wireless Access Point delivers high-speed dual-band connectivity with 300Mbps on 2.4GHz and 867Mbps on 5GHz, ensuring stable and fast internet for home or office networks. Its adjustable power and automatic weak signal elimination optimize network performance while reducing interference. With unified AP management and dual power supply support, this access point offers flexible deployment without the need for extra controllers. Perfect for high-performance Wi-Fi, seamless streaming, online gaming, and large-area coverage, the EAP912 ensures reliable and efficient wireless networking.
