Product Description

The Longse NVR3116C1 16-Channel 4K Network Video Recorder is a reliable and high-performance IP surveillance solution designed for homes, offices, and commercial security systems. Supporting 16 IP cameras with 128Mbps bandwidth, this 4K NVR delivers smooth recording using advanced H.265+/H.265/H.264 video compression to save storage without compromising quality. It features single HDD support up to 10TB, stable DC12V power input, durable metal housing, and a UK plug, making it ideal for scalable and professional CCTV IP camera systems and network video recording setups.
