Product Description

The Lexar® JumpDrive® S80 USB 3.2 Gen 1 Flash Drive (32GB) offers fast and reliable storage in a compact and durable design. With up to 150MB/s read speed and 60MB/s write speed, this USB flash drive ensures quick data transfers and smooth performance, perfect for storing and transferring large files, documents, photos, and videos. Designed with USB 3.2 Gen 1 interface, the Lexar JumpDrive S80 provides high-speed performance for both PC and Mac® systems, making it an ideal solution for users across various platforms.

The Lexar JumpDrive S80 is plug-and-play, meaning no software is required for setup, allowing you to instantly start using it on any compatible device. Its sleek design and compact size make it highly portable and easy to carry, offering a convenient way to keep your essential files with you wherever you go. This USB flash drive also features backward compatibility with USB 2.0 ports, ensuring that it works with older devices as well.

Perfect for users looking for fast file transfers, secure data storage, and cross-platform compatibility, the Lexar 32GB JumpDrive S80 is your go-to solution for on-the-go storage needs. Whether you're backing up important files, transferring media, or storing work documents, this USB 3.2 flash drive delivers speed and reliability in a sleek, compact package.
