Product Description

The Lexar® 128GB High-Performance 800x SDHC™/SDXC™ UHS-I Card BLUE Series is engineered for high-speed performance and reliable storage, offering up to 120MB/s read speed and up to 45MB/s write speed. Ideal for professional photographers and videographers, this card is designed to meet the demands of Full HD (FHD) and 4K video capture, ensuring smooth video recording and fast file transfers. With a Speed Class 10, U3, and V30 rating, this card supports high-quality video recording and fast data transfers, making it perfect for DSLR cameras, mirrorless cameras, and action cams.

The Lexar 128GB SDXC UHS-I Card offers 128GB of storage, providing ample space for storing photos, videos, and other important media files. It is built to withstand harsh conditions and offers exceptional reliability for photographers and videographers who need fast, durable storage in the field. Whether you're capturing 4K video or taking high-resolution images, the Lexar 128GB SDXC UHS-I Card delivers the speed and capacity needed for high-performance digital imaging.

Designed for professionals and enthusiasts alike, the Lexar High-Performance 800x SDXC UHS-I Card ensures fast data transfer and enhanced video capture performance, making it a must-have for anyone looking for reliable, high-speed storage for their digital content. Perfect for high-speed photography, video recording, and data storage on the go.
